Maternal Fetal Group New To Bowling Green

The Medical Center at Bowling Green is pleased to announce the expansion of Maternal Fetal Group (MFG) into the Bowling Green community. MFG is comprised of Board Certified/Eligible perinatologists, and their practice is accredited by the American Institute of Ultrasound in Medicine. MFG is located in Riverside Professional Center, adjacent to The Medical Center, and specializes in consultation and ultrasound services for high risk expectant mothers.

Maternal Fetal Group has cared for women with complicated pregnancies in Nashville and the surrounding communities since 1992. In 2008, the practice became affiliated with Obstetrix Medical Group, a national provider of maternal-fetal medicine. This partnership formally transferred the administrative functions of MFG to Obstetrix, allowing the local physicians to focus exclusively on patient care and enhancing relationships with referring physicians. It has also enabled them to increase staff to better serve the needs of the rapidly growing community. Drs. Salvatore Lombardi and Stephen Fortunato are senior partners for the practice, and completing the team are Tiffanee Lenzi, M.D., Ph.D., Guoyang Luo, M.D., Ph.D., and Kathleen Mayor-Lynn, M.D.

Founded in 1997, Obstetrix Medical Group has more than 125 maternal-fetal medicine specialists, 100 sonographers and 40 advanced practitioners providing care in 11 states across the country. The unique characteristics of Obstetrix, including multiple practices, access to a large volume of complicated pregnancies and ties to neonatal practitioners, provides an unparalleled opportunity to conduct clinical research to advance evidence-based care.
