Introducing The Medical Center Patient Flow and Transfer Center

To centralize and improve the patient admission and transfer process, The Medical Center at Bowling Green has established a Patient Flow and Transfer Center. When you call the Patient Flow and Transfer Center, we'll arrange the *acceptance, admission* and *transportation* of your patients to The Medical Center.

The Patient Flow and Transfer Center:

- Saves you time by requiring only one call
- Allows for communication between transferring and hospital physicians
- Creates faster and seamless transfer of your patients to The Medical Center
- Allows hospital staff to be better prepared for transfer patient, which can lead to better patient care

Here's how it works:

- Physician or referring facility calls the transfer center toll free at **(866) 384-1142** or **745-1404**.
- A transfer center associate will obtain information including patient's name, age, diagnosis, and type of service requested, as well as the location of the patient and mode of transportation to the hospital.
- A nurse will then connect, via telephone, the referring physician with the appropriate hospital physician to finalize the transfer.
- Upon mutual physician approval, the nurse will complete the transfer of the patient and assist with transportation if necessary.

For more information about the Transfer Center, please call Scott Stivers, Director Professional Relations at 745-1531.
